

Excerpt of
The Why3 platform
by François Bobot, Jean-Christophe Filliâtre, Claude Marché, Guillaume
Melquiond, Andrei Paskevich

Key questions

- i Does Why3 support parallel verification?
- ii If so, how does Why3 support parallel verification?

The Why3 manual mentions parallelism twice. Section 6.3.4 describes the preference dialog of Why3's GUI. It mentions an option to set “the maximal number of simultaneous provers allowed to run in parallel”. The appendix section A.2 mentions “prover calls in parallel” as a new feature w.r.t. Why2.
